PROJECTS

LARAVEL

- **E-Commerce Website**
  It is a multi-vendor e-commerce web app enriched with a variety of features such as dynamic filters on the store page, order tracking, and cancel, return, or exchange the orders.
  I built this store on my own using Laravel & Livewire you can check it out *ow.ly/e-commerce*
  (Oct 2022 - Jan 2023)

- **AN Academy management**
  Registration in the academy takes place by determining what the fees are, "study, bus,.." and adding an account for this student containing the the final amount so that he can later pay off debts "in one payment or installments". Promote or graduate students from the academy at the end of the year. A simple test system after each lecture added by the teacher, you can check it out
  ow.ly/academy
  (Aug 2022 - Oct 2022)

- **Wa3i**
  It's a membership & certification system. I worked on this project while being super-visioned by a senior engineer. My assignments were: crud employees, sections, translation, and a little bit on membership (project core), working on dashboards and creating stats.

FRONTEND
I am a qualified web developer professional in web design. I devised more than 15 responsive websites Increasing day by day. Latest Project *ow.ly/portfolio*
